

## GAMMA POLISHING PAD FOR ENGINEERED STONE IS ENDORSED BY CAESARSTONE

### CAESARSTONE GIVES OUR GAMMA PAD TOP REVIEWS!

The countertop industry has waited a long time for a high performance polishing pad for Engineered Stone. Working closely with our local fabricators and CaesarStone, the global leader in engineered surfaces, we have developed the highly anticipated **GAMMA** pad.

This specially formulated pad is designed to tackle the toughest of engineered stones. The **GAMMA** is extremely flexible and handles shaped edges with ease. This pad is ideal for countertops, tabletops and backsplashes and any other job for residential or commercial environments. Not convinced? See what CaesarStone has to say about the **GAMMA** pad.

*“Based on [our] evaluation I am pleased to say that CaesarStone highly recommends the use of the **GAMMA** pads to polish all CaesarStone products. Our technical trainers were so impressed with the results they achieved that we are going to include a recommendation for **GAMMA** in our new Fabrication Manual. We appreciate the quality of your products and look forward to working with your company in the future”*

The **GAMMA** pad is available from 50 grit through to 3000 grit. The full sequence ensures a consistent and beautiful shine with depth and clarity.

The white resin leaves no marks, points or any other color transfer.

Few resin pads have stood-up to the test of engineered stone, but we assure you that you will find the **GAMMA** pad handles the job with spectacular results.
